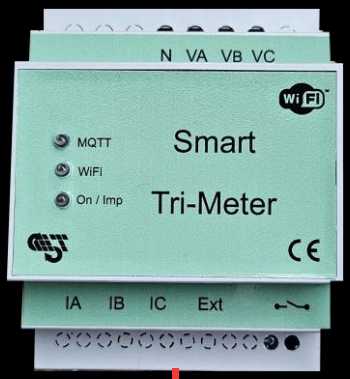
SOLAR ENERGY MANAGEMENT
SINGLE-PHASE AND THREE-PHASE
FRENCH MANUFACTURER

Smart Tri-Meter Eco-Contacteur

Solar surplus to the water heater



Single-phase Eco-Contacteur

Tri-Meter + 1 to 3 clamps
grid, solar, load

Three-phase Eco-Contacteur

Tri-Meter + 3 clamps
one clamp per phase

In both versions: programmable clock, EcoMax, load shedding

Economical by design

- One single module: it measures and it controls
- No modulator: a simple contactor is enough
- Off-peak hours: optimised management
- EcoMax: no needless heating at night

Designed for installers

- Clamps: direction corrected automatically
- Monitoring: built-in interface + online dashboard
- Open: HTTP, REST, MQTT, Home Assistant
- WiFi plug: automatic reconnection

ONE ON/OFF OUTPUT, YOUR CHOICE

Direct contact for a power contactor

or

Shelly Gen3 WiFi plug remote-controlled, automatic reconnection

Compatible with all types of water heaters, heat pumps and reinforced EV sockets.

For fine proportional control, to the watt: Smart PV-Router.
